

## Water purifier SEAGULL IV ® X-1

### Field of application

- Homes
- Boats
- Motorhomes and Caravans

### Features

- pressure vessel in AISI 304 stainless steel
- easy replacement of the cartridge

### Technical data

- Cartridge RS-1 SG
- Retention 0,1 micron
- Flow 4 Lt/min
- Capacity 4.000Lt\*
- Dimensions Ø12,2xH13,7cm
- Operating pressure da 1 a 8 ATM

### Phases of the purification process

1. Microfiltration through a structured matrix retention 0.1 micron con passaggio to remove water born pathogenic bacteria, parasites, radioactive particles and other micro particles.
2. Adsorption of organic chemical compounds by broad-spectrum absorbent substances particularly effective against chlorine, pesticides, herbicides and methylmercury
3. Bactericidal and not bacteriostatic action
4. permanent induction in the matrix of + and – electrostatic charges to remove even smaller particles

### Equipment

- Faucet for model X-1/F
- Diverter for model X-1/D

### Item

10.03/B	Seagull IV X-1B Base
10.03/F	Seagull IV X-1F Faucet
10.03/D	Seagull IV X-1D Diverter
