

Filling valve Side installation ITS COMPACT LATERALE

Application Area

- In wall and external cisterns

Characteristics

- Universal installation
- The most compact of the category
- Counter pressure filling valve
- Ultra silent
- Immediate shut off of the flow at the desired level using inlet water pressure
- Pressure stable, easy water level adjustment
- Corrosion resistant materials (POM)
- Easy and fast installation
- Anti syphon system to avoid pollution of the main line

Dati tecnici

| | Data | Dimensions |
|------------------------|-----------|------------|
| Min working pressure | 0,2 bar | H = 225 mm |
| Max working pressure | 14,0 bar | T = 52 mm |
| Connection | 3/8" | L = 100 mm |
| Water level regulation | 80÷160 mm | |

Part #: 2.01
